PROFESSIONAL SUMMARY

Motivated and results-oriented Electrical and Electronics Engineering undergraduate aspiring to build a career in Software Development. Strong foundation in Java, Data Structures and Algorithms, SQL, Cloud Computing, Data Analytics, and Azure AI, with excellent problem-solving and analytical skills. Passionate about designing efficient software solutions, learning new technologies, and solving real-world challenges through technology. A quick learner with a collaborative mindset, eager to contribute to innovative software teams while continuously expanding technical expertise.

EDUCATION

Bachelor of Engineering (B.E.) | Electrical and Electronics Engineering

2023 – 2027 (Expected)

SNS College of Technology, Coimbatore

CGPA : 8.33/10

TECHNICAL SKILLS

Programming & Software Development: Java | SQL | Object-Oriented Programming (OOP) | Data Structures & Algorithms (DSA) | Problem Solving

Core Computer Science: Database Management Systems (DBMS) | Operating Systems | Computer Networks | Software Development Fundamentals

Cloud & AI: Cloud Computing | Microsoft Azure AI | Azure App Services

Version Control & DevOps: Git | GitHub | Docker

Development Tools & IDEs: Visual Studio Code | IntelliJ IDEA | Eclipse

AI Productivity Tools: GitHub Copilot | ChatGPT | Claude | Antigravity

Data Analytics & Productivity: Data Analytics | Microsoft Excel | Microsoft Word | Microsoft PowerPoint | Power BI

PROJECTS

AI-Powered Used Car Price Prediction System

Technologies: **Java | Machine Learning | Linear Regression | SQL | Kaggle Dataset**

- Developed an AI-powered application to predict used car prices using a Linear Regression model trained on a Kaggle dataset.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Integrated the machine learning model with a Java-based application for real-time price prediction.
- Utilized SQL for efficient data storage and retrieval while optimizing model performance through data validation.

LT Transmission Line Fault Detection Live Dashboard

Technologies: **HTML | CSS | JavaScript | ESP32 | IoT**

- Developed a responsive web dashboard for real-time monitoring of LT transmission line faults.
- Implemented real-time data synchronization between ESP32 devices and the dashboard for live fault visualization.
- Designed interactive dashboards to display fault locations, system status, and operational insights.
- Performed system integration, testing, debugging, and technical documentation to ensure reliable performance.

AR/VR Virtual Try-On Application

Technologies: **Augmented Reality (AR) | Virtual Reality (VR) | Computer Vision | Artificial Intelligence**

- Developed an AR/VR-based virtual try-on application for an immersive product visualization experience.
- Integrated computer vision techniques for real-time object detection and virtual product placement.
- Designed an intuitive user interface to enhance user engagement and virtual shopping experiences.
- Optimized application performance through testing, debugging, and iterative feature enhancements.

Additional Projects: Successfully developed multiple academic and engineering projects in the Electrical and Electronics domain, including IoT, embedded systems, industrial automation, renewable energy, and power system applications.

INTERNSHIP EXPERIENCE

PCB Design Intern | Atchayam Electronics

Aug 2024 – Sep 2024

- Assisted in the design and validation of Printed Circuit Boards (PCBs) for embedded electronic systems.
- Performed circuit testing, hardware debugging, and quality verification to ensure reliable performance.
- Prepared technical documentation and collaborated with engineers to troubleshoot design issues.

Field Engineer Intern | S&T Machinery – CNC Manufacturing Unit

Jun 2025 – Jul 2025

- Gained hands-on experience in CNC manufacturing processes, industrial automation, and production workflows.
- Assisted in machine installation, preventive maintenance, troubleshooting, and operational testing.
- Analyzed machine performance while developing strong problem-solving and technical documentation skills.

Embedded Systems Intern | LinkX Labs & Embedded Solutions

May 2026 – Jun 2026

- Developed embedded system applications using microcontrollers for IoT-based solutions.
- Designed and developed an LT Transmission Line Fault Detection Dashboard for real-time fault monitoring and visualization.
- Participated in system integration, testing, debugging, and technical documentation throughout the development lifecycle.

ACHIEVEMENTS & CERTIFICATIONS

- First Runner-Up**, Technocognition 2025 – Dayananda Sagar University, Bengaluru.
- Winner**, Project Presentation Competition – Sri Krishna College of Engineering and Technology (SKCET), Coimbatore.
- Winner**, Innovatex – NGP College of Technology, Coimbatore.
- Winner**, Ideathon – Sri Ramakrishna Engineering College (SREC), Coimbatore.
- Treasurer**, VIMZER Association, Department of Electrical and Electronics Engineering.
- Microsoft Certified:** Azure AI Fundamentals (AI-900)
- Microsoft Learn:** Data Analytics Learning Badges
